Netwrix Auditor for Office 365

Ease the burden of Office 365 auditing

Netwrix Auditor for Office 365 empowers you to quickly detect, investigate and remediate security threats in your Office 365 environment before they result in a data breach or business downtime. Gain complete visibility into user activity, data access and permissions in Exchange Online, SharePoint Online and OneDrive for Business so you can enhance security, ensure service uptime and streamline IT compliance.

DETECT SECURITY THREATS

Enables you to spot and investigate improper configuration, security and permission changes, as well as suspicious logon attempts, across your Exchange Online, OneDrive for Business and SharePoint Online environments.

PASS COMPLIANCE AUDITS WITH LESS EFFORT

Slashes the time required to prepare for audits with ready-to-use reports mapped to PCI DSS, HIPAA, GDPR and other common regulations. The interactive search enables you to quickly respond to ad-hoc questions from auditors.

INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Empowers IT teams to more effectively detect and mitigate security threats, assess and mitigate IT risks, and automate reporting and other routine tasks so they can focus on more strategic initiatives.

CUSTOMER FEEDBACK

"For us, Netwrix Auditor has been a lifesaver. There have been instances when changes were made to critical systems and we investigated and resolved these issues in mere minutes. Netwrix Auditor enables us to detect anomalous behavior around critical privileged accounts and streamline audit preparation time from several weeks to just 20 minutes."

Anthony Jarrett, Director of Enterprise Services, Teach For America

Key Features of Netwrix Auditor for Office 365

ALERTS ON CRITICAL ACTIVITY

Detect potential threats and take action before they cause real damage with predefined and custom alerts. Get notified about improper activity, such as changes to your mail server security configuration or SharePoint Online sharing settings.

FULL CONTROL OVER ACCESS TO SENSITIVE MAILBOXES

Detect unauthorized Exchange Online mailbox access, track all non-owner activity and spot improper delegation to prevent overexposure of sensitive data and reputation damage.

INTERACTIVE SEARCH

Easily investigate security incidents, find the root cause of operational issues and answer questions from auditors. Save your searches as custom reports for future use.

DETAILS ABOUT PERMISSIONS

Determine who has access to which files on SharePoint Online and OneDrive for Business. Secure sensitive content by revoking excessive permissions, and easily compare the current state of effective permissions to any point in the past.

VISIBILITY INTO SHAREPOINT ONLINE DATA ACCESS

Uncover improper user access to sensitive content with reports on who accessed your SharePoint Online lists and who viewed or downloaded documents from your SharePoint Online and OneDrive for Business.

READY-TO-USE COMPLIANCE REPORTS

Slash time spent preparing for compliance audits. Quickly provide all the necessary information to auditors, answer their ad-hoc questions and prove that your Office 365 environment meets security requirements.

HOW IS NETWRIX AUDITOR FOR OFFICE 365 DIFFERENT?

NON-INTRUSIVE ARCHITECTURE

Netwrix Auditor operates in agent-less mode and does not degrade system performance or cause downtime.

TWO-TIERED DATA STORAGE

Keeps your entire audit trail for more than 10 years in a cost-effective storage and ensures easy access to it throughout the entire retention period.

RESTFUL API

Integrates with other security, compliance and IT automation tools to expand visibility to other systems and enhance the security of your organization.
